

# ONE FOR ALL!

## Your specialist for:

- ▶ Industrial marking
- ▶ Label print
- ▶ Automatic identification

**alpharoll**

## ▶ VARIABLE LABEL PRINT

Thermal transfer printers are the classic solution wherever variable data have to be printed on labels. We are official ZEBRA partner, but we can also offer you printers from other manufacturers.

## ▶ SCANNERS

For capturing data, we can offer you a large range of different scanners. We will find the best suited device for you – no matter if you need a hand-held scanner or a mobile scanner.

## ▶ INKJET PRINTERS

You would like to mark your products or packagings by means of the continuous inkjet procedure? We can supply you with high-end printers from the Japanese manufacturer KGK. Thanks to sophisticated state-of-the-art technology, these devices are especially long-lived and low in maintenance.

## ▶ SERVICE

Consulting, maintenance, repair – we are your competent partner for all questions relating to your identification solution. We help you in selecting the products, maintain your equipment and repair it expertly in case it has been damaged.

## ▶ SOFTWARE

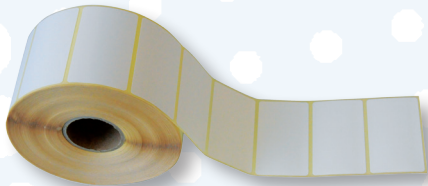

If your case of application is highly specific, we are quite willing to program an individual software for you. For laying out labels, we can supply you with the tried-and-tested software by Codesoft, which is available in different versions. This program enables you to create and include barcodes, matrix codes and safety alert symbols.

## ▶ THERMAL TRANSFER RIBBONS

We supply you with the thermal transfer ribbon matching your thermal printer and the material to be printed. Does the print have to meet extraordinary requirements, like e. g. a high resistance against isopropyl alcohol? Our long-standing know-how is at your disposal!

## ▶ LABELS

Which label is best suited to your purposes? The crucial properties are adhesion, resistance against smearing and scratching, against chemicals, high and low temperatures, the label's non-hazardousness to health and, of course, its economic viability. There is a huge choice. We are happy to advise you competently.

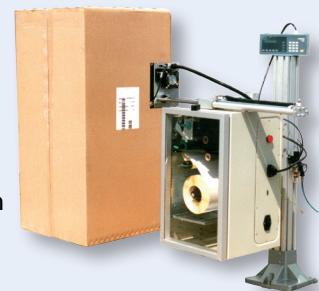

## ▶ INKJET INKS

For almost any current inkjet printer, we can offer you ink, make-up and cleaner. The consumables produced in the USA are subject to a strict quality control. Save up to 40 % compared to the original product!

## ▶ SPECIAL SOLUTIONS

Your application is unusual and cannot be mastered satisfactorily by means of conventional methods? No problem! We will analyse your requirements in a professional manner and find the optimum approach for you thanks to our long-standing experience. We have already created a large number of tailor-made solutions for our customers. We will be happy to develop a suitable system for you as well.

## ▶ THE TEAM

alpharoll is your partner when it comes to labelling and marking goods and shipments of all kinds. Since 1996, we have been counselling and supplying customers from industry, trade, administration, and health care (hospitals, medical engineering, insurances). We advise you with regard to the most reliable and cost-effective identification solution and provide you with everything you need: hardware, software, consumables, and service.
